Glimpse from the Gavel - **Model A Days**

There are many choices available each season to attend a Model A event or tour. This year we joined the local Model T Club on their tours. Each was short but fun and always ended with ice cream A BIG thank you to their officers for having the insight to include us. It was fun!

In August, a large group of us “putted along” in our Model A’s to Amana Colonies, IA for their Model A Day, sponsored by the Hawk-Eye Model A Club. The Rock-Ford A’s had the largest percentage of the 83 Model A’s displayed.

This past September, 11 members of the Rock-Ford A’s traveled to the Gilmore Auto Museum in Hickory Hills Michigan to attend their annual Model A Day. This is a first class Museum with several buildings housing the most beautiful restored autos you could see in one complex anywhere. You could walk up to most and look inside to inspect the interiors. Very few were roped off. The Ford Model A’s have their own free-standing building and, in my opinion, it’s the best one. Not only was there a mix of interesting, common and rare Model A’s - there were displays of engines, frames, carburetors, machinery, tools and period literature. An airplane housing a Model A engine was suspended from the ceiling. There was also an impressive reproduction of a dealership parts department.

September 22nd was International Model A Day. After 23 attended breakfast, John and Sue Hausen led 8 Model A’s across Northern IL around Rock Cut State Park and along blacktop roads to the Boone County Museum. Three other members met us there. It is a small Museum with displays from Boone County. This “cruise” ended, of course, with a stop at the Dari-Ripple for ice cream. It was a great time!

With the description of all these Model A Day events, NONE surpassed our Sharon Model A Day attendance of **194 Model A’s!** This is an outstanding number for a local club. Driving your Model A is where the real fun is!

Keep on motoring, Ron and Jim

USING BEADS TO ENHANCE ERA FASHIONS By Rosie Cassou, Cruisin A's of Hemet, CA

Article and picture submitted by Chris Aupperle

Early Bead History Beads have been made by every culture and have been revealed in archaeology sites. October 12, 1492, Columbus recorded in his logbook the natives of San Salvador Island were given glass beads. This is the earliest written record of glass beads in the Americas. His ships carried glass beads along with other European trade goods. The Spanish explorers in 1527 and in 1539 carried glass beads for trade with the native inhabitants of Florida. Types of Beads Most often, it was an old-fashioned stone drill bit pumped by hand or even an awl that created the hole in the natural bead or stone so that it could be strung. Natural Beads are made from natural materials such as bone, teeth, stone, wood and fossilized bamboo, skeleton of sea creatures, shells, abalone, coral, mother-of-pearl, pearls, dentalium shells, horns of many animals, and ivory from tusk of elephants until it was banned. During the Model A Era, you would find beads hand sewn on evening dresses, lace, head gear, purses and in the jewelry worn for daytime and evening. Great care should be taken with the cleaning of any dress, lace, gloves or outfit that has vintage beads attached to it, to not ruin the color or appearance of these hard to find vintage items.
